ABOUT ME

I am a B.Tech student with a strong interest in technology, coding, and problem-solving. Alongside academics, I am an accomplished athlete, having secured medals in sprinting at state and zonal levels, which reflect my discipline, determination, and competitive spirit. My hobbies include volleyball, cricket, and exploring new skills that help me stay active and innovative. I have also gained exposure to cybersecurity through a workshop at IIT Kanpur. With a balance of academics, sports, and personal growth, I aim to develop my technical expertise and contribute effectively in professional and collaborative environments.
